
APP UPDATE REPORT

Leadra App Update Report

Completed improvements and refinements

DATE	STATUS
May 18, 2026	Implemented and ready for review

This report summarizes the latest improvements completed for the Leadra app. The updates focused on making the platform easier to use, improving the unit creation experience, refining client-facing documents, and polishing key mobile and review screens.

Executive Summary

Completed improvements and refinements for the Leadra app.

Update summary

The latest update improves how users search for units, create new listings, review uploaded media, and share unit PDFs with clients. These changes make daily workflows faster, clearer, and more reliable for the Leadra team.

UPDATE FOCUS

Search

Global unit search now works directly from the main Units page.

Creation

The unit creation flow is clearer, more flexible, and more reliable.

Sharing

Client PDF filenames are cleaner and easier to use.

Report Focus Areas

The main areas covered by this update.

Easier platform use

The platform is easier to navigate and search from one central Units page.

Improved unit creation

The create-unit experience is clearer, more flexible, and more reliable.

Refined client documents

Client-facing PDFs now use shorter, cleaner filenames for sharing.

Mobile and review polish

Mobile review screens have been refined so uploaded media stays visible.

Implemented Improvements

Key changes applied to the live Leadra app.

Global Unit Search

01

Users can now search and filter units directly from the main Units page across all destinations and projects, without needing to select a destination first.

Improved Browsing Flow

02

Destination and project cards are still available for structured browsing, but users now also have a faster direct-search option.

Owner Name Flexibility

03

The app now allows the same owner name to be reused when creating units, making data entry more practical for real-world cases.

Smarter Duplicate Handling

04

Duplicate prevention remains focused on owner phone numbers, helping avoid actual duplicate records without blocking valid entries.

Cleaner Client PDF Names

05

Client PDF filenames are now shorter and cleaner, keeping the important unit information while removing unnecessary extra details.

Improved Media Review Experience

06

The media review section is easier to read and use, especially when reviewing uploaded images before submitting a unit.

Better Mobile Layout

07

The create-unit review screen has been refined for mobile so action buttons no longer cover uploaded media or interfere with review.

Clearer Create-Unit Feedback

08

The unit creation flow now provides clearer messages when something needs attention, reducing confusion for users.

More Reliable Unit Creation

09

The create-unit process has been strengthened so saved units and their media behave more consistently.

Live App Update

10

The latest version has been applied to the live Leadra app and is ready for client review.

Client Benefits

Practical gains for sales, admin, and review workflows.

- ✓ Faster unit discovery from one central page.
- ✓ More practical data entry for sales and admin teams.
- ✓ Cleaner PDF files when sharing units with clients.
- ✓ Better mobile experience during unit creation.
- ✓ Clearer feedback when creating or reviewing listings.
- ✓ More polished and reliable day-to-day workflow.

Suggested Review Checklist

Recommended checks before wider team use.

- 1 Open the Units page and test filtering before selecting a destination.
- 2 Search across multiple destinations and projects.
- 3 Create a unit using an owner name that already exists.
- 4 Upload media and review the final create-unit screen on mobile.
- 5 Generate a client PDF and confirm the shorter filename format.
- 6 Confirm the live app feels clear and ready for team use.

Closing

These updates improve the usability, clarity, and polish of the Leadra platform while keeping the app aligned with the team's real operational workflow.
