

Leadra App Update Report

Completed improvements and refinements

May 18, 2026

Implemented and ready for review

Executive Summary

Latest Leadra improvements make the platform easier to use, speed up unit discovery, refine unit creation, improve media review, and clean up client PDF sharing so daily workflows are faster, clearer, and more reliable.

Implemented Improvements

10 completed updates

01

Global Unit Search

Search and filter units from the main Units page across all destinations and projects.

03

Owner Name Flexibility

Reuse the same owner name when creating units for practical data entry.

05

Cleaner Client PDF Names

Shorter filenames keep key unit details and remove extra information.

07

Better Mobile Layout

Mobile review actions no longer cover uploaded media or interfere with checks.

09

More Reliable Creation

Saved units and their media now behave more consistently.

02

Improved Browsing Flow

Destination and project cards remain, with a faster direct-search option.

04

Smarter Duplicate Handling

Duplicate prevention focuses on owner phone numbers to block true duplicates.

06

Improved Media Review

Uploaded images are easier to review before final unit submission.

08

Clearer Create-Unit Feedback

Users see clearer messages when something needs attention.

10

Live App Update

The latest version is applied to the live app and ready for client review.

Client Benefits

impact

- Faster unit discovery from one central page.
- More practical data entry for sales and admin teams.
- Cleaner PDF files when sharing units with clients.
- Better mobile experience during unit creation.
- Clearer feedback when creating or reviewing listings.
- More polished and reliable day-to-day workflow.

Suggested Review Checklist

client QA

- Open Units and test filtering before choosing a destination.
- Search across multiple destinations and projects.
- Create a unit using an owner name that already exists.
- Upload media and review the final create-unit screen on mobile.
- Generate a client PDF and confirm the shorter filename format.
- Confirm the live app feels clear and ready for team use.

Closing

These updates improve the usability, clarity, and polish of the Leadra platform while keeping the app aligned with the team's real operational workflow.
