Ready

Executive Summary

This update improves how users search for units, create listings, review uploaded media, and share unit PDFs with clients. Daily workflows are now faster, clearer, and more reliable for the Leadra team.

Client Benefits

- **Faster unit discovery from one central page.**
- **Cleaner PDF files when sharing units with clients.**
- **Clearer feedback when creating or reviewing listings.**
- **More practical data entry for sales and admin teams.**
- **Better mobile experience during unit creation.**
- **More polished and reliable day-to-day workflow.**

Implemented Improvements

Global Unit Search

Search and filter units from the main Units page across all destinations and projects.

Improved Browsing Flow

Destination and project cards remain available, with a faster direct-search path.

Owner Name Flexibility

The same owner name can now be reused when creating units for real-world cases.

Smarter Duplicate Handling

Duplicate prevention stays focused on owner phone numbers to avoid actual duplicate records.

Cleaner Client PDF Names

Client PDF filenames are shorter and cleaner while preserving important unit information.

Improved Media Review

Uploaded image review is easier to read and use before submitting a unit.

Better Mobile Layout

Review screen action buttons no longer cover uploaded media on mobile.

Clearer Create-Unit Feedback

The creation flow gives clearer messages when something needs user attention.

More Reliable Unit Creation

Saved units and their media now behave more consistently through creation.

Suggested Review Checklist

- ☐ Open Units and test filtering before selecting a destination.
- ☐ Search across multiple destinations and projects.
- ☐ Create a unit using an owner name that already exists.
- ☐ Upload media and review the final create-unit screen on mobile.
- ☐ Generate a client PDF and confirm the shorter filename format.
- ☐ Confirm the live app feels clear and ready for team use.

Closing

These updates improve the usability, clarity, and polish of the Leadra platform while keeping the app aligned with the team's real operational workflow.
